

Log prices took another big jump, finally hitting the \$1,000 thousand board feet level for export Doug-fir logs for the first time in 20 years. Doug-fir domestic logs are over \$800/mbf. Alder sawlogs are in good demand at \$900/mbf for 12 inch sawlogs.

Export Hemlock and true fir remains at the \$720-\$730 level.

Looks like a great time to log!
